

MADE IN USA

PREDATOR[®]

DRILLING MOTOR BLOWERS

Manufactured By GlobalTech Motor & Controls

WHAT SEPERATES THE PREDATOR FROM COMPETITION

- Keeps dirt, sand, bugs, water and other contaminates out of motor
 - Longer life between rebuilds, Less downtime for rig, Increased brush life
 - Mechanical filtration, no filters required
 - Designed to mount directly onto GE752 Factory or Conversion Frame
 - Superior air flow & static presure output - Outperforms the competition!
 - Heavy guage carbon steel or high quality stainless steel
 - Quieter than the competition, and 100% welds!
 - Smart design slim intake cover - In most cases, offsets are not needed
 - Easy impeller maintenance & removal - Impeller removal from either end
- ONLY FILTERING BLOWER ON THE MARKET TO OFFER THIS FEATURE

SMART SLIM INTAKE COVER DESIGN

- A space saving, money saving intake design
- Customer does not have to sacrifice blower efficiency
- Smart design reduces amount of water or contamination
- In most cases, additional offset adapters are NOT needed

IMPELLER MAINTENANCE

- Only filtering blower on the market in which the impeller can be removed from either end of housing
- No need for entire blower removal to change out impellers or AC blower motors
- Standardization of Quick-Disconnect bushing to prevent shaft cutting when hub seizes

5HP to 25HP

PROTECTED BY U.S.PATENT No.: US 8,353,665 B1
